Change of Name.

After forty-four years of operation during which it has grown up with the country and contributed in no small way to Canadian development the Dominion Express Company will no longer be known by that name. After Sept. 1st next that great transportation agency will be known as the Canadian Pacific Express Co. In all parts of Canada and the United States and throughout the civilized world signs on the windows of the many hundreds of branch offices will be changed, and thus will be forged a still closer link with the great parent company whose railroads, steamships and hotels are known around the world.

To mark the change of name the Company has issued an attractive little booklet giving a short history of its career and a synopsis of its present widespread activities. The Dominion Express Co. was incorporated in 1873, but it was in 1882 that Mr. Van Horne, then Pres. of the C.P.R., took it over as an operating

part of the Canadian Pacific Co. Mr. G. A. Kirkpatrick, former Sir Geo. Kirkpatrick, Lieut.-Gov. of Ontario, was its president, and Mr. W. S. Stout, a young but thoroughly experienced express man, became its Supt. Mr. Stout is today Pres. and for many years has guided its fortunes in that capacity. For some years he and his assistants had a hard and uphill fight. They not only moved traffic but helped create it by finding Canadian and foreign markets for Canadian products and by scientific rate making encouraging the farmer, fruit grower and others whose markets were far away. The growth of the company over these many years is an interesting story. The Company is daily entrusted with hundreds of millions of dollars in goods and treasure by the public, business institutions and Government, and this is a matter for justifiable pride. The booklet is handsomely illustrated and is being widely distributed wherever the Company operates.

LOCAL NEWS.

Mr and Mrs John Kulak are spending their honeymoon at Banff. On their return, John will take a class-room in a Wetaskiwin school, which opens on Wednesday.

Mrs Britton and her boys have moved to Edmonton, to reside.

Mr Jos. Babien, Mayor of Wabamun, was a business visitor to Stony on Friday.

After this date, all the business houses in Stony will be open every afternoon in the week.

Mr Geo A. Nicholls is still confined to the house thru the injuries to his foot sustained in an auto accident on the 15th inst.

The Sunday School classes at the local Union Church were resumed on Sunday last, with the usual number of scholars in attendance.

Owing to weather conditions, the dance billed in Stony Saturday night had to be postponed indefinitely. The hall is engaged for next Saturday evening for the Hon. Charles Stewart meeting.

The members of the Ladies Aid of St. Matthew's Church held a meeting on Thursday evening.

Potato growers are beginning to complain about the probability of a poor crop this season. In nearly all the cases the same area as formerly had been planted to potatoes, but the return will not be near that of 1925. There are the usual number of vines, but the tubers in the hills are rather scarce, in frequent instances one solitary "spud" clinging to the vine. A number of causes are ascribed for the smallness of the crop—principally moisture.

Commencing today, there is on exhibition in Stony Plain a display of the finest cars which have so far been shown in this town. These are types of the new all-steel body Essex "Six" Coach, and the Hudson Coach and a Hudson Sedan. The exhibit is in charge of Mr M. M. Brunelle, who is taking great pleasure in showing the new Essex "6" Coach. This latter is all-steel, bolted and riveted, and absolutely impervious to rattles or squeaks. This Essex is finished in the new style high-baked enamel, which gives the Coach a highly-pleasing appearance.

The Hon Arthur Meighen made one of his notable speeches in Edmonton Thursday evening, when a number of stalwart Tories of town and district motored to the City to hear it. Those who were unable to make the trip listened to the speech over the radio at Oppertshausen's Store, thru the courtesy of the members of the firm. The machine used was the well-known Atwater-Kent "20-Compact" receiving set, of which there are a number in this district which are giving satisfaction.

Exercise Your Franchise

It is one of the peculiarities of the human race that they intensely desire that which they are prohibited from having but which, once they obtain it, they neglect and frequently lose all interest in. It is an inherited trait in the human make-up. According to the Bible story our first parents were given full ownership and use of everything in the Garden of Eden except one thing—they were forbidden to eat the fruit of one particular tree. And that was the one thing they longed for and felt they must have.

It has been found the world over that exacting prohibitory laws fall in their objects unless they are backed up with not merely a strong public opinion but practically an unanimous one. Legislative enactments without proper educational force culminating in public opinion generally prove a failure, because when people are told they cannot have or do any particular thing, that is exactly what they are deterred to have or do. Apparently the best way to make children desire something is to tell them they cannot have it, and it is generally true that when they are given it they no longer want it.

This very human characteristic finds expression in politics as in other matters. From time immemorial men have agitated, struggled, fought, and died to obtain the right of self-government. Men and nations have been prepared to sacrifice everything else to achieve personal and national liberty, the right to make and administer their own laws. Some of the most terrible wars have been fought over this one issue. The revolt of the American colonies and the War of Independence, the American Civil War, the French Revolution, the South African War, not to enumerate the many struggles recorded in all English histories, tell the story of man's fight for self-government. Early Canadian history, the old Family Compact, and the gradual development of responsible government, is a long continued story of the same struggle.

Now that the fight has been waged and victory achieved in nearly all civilized countries, and men are accorded the full privileges of citizenship, a free and secret ballot, and full power to choose those who will make and unmake laws and administer public affairs, what value does the average man place upon this great privilege and right? Women, too, agitated for the right to vote on terms of equality with men, and only at a comparatively recent date were accorded that right. What value do they now place upon it?

In the last Presidential election in the United States it was necessary for public-spirited men and women and great public bodies and organizations to engage in a nation-wide campaign to arouse the general public out of their indifference sufficiently to get them to the polls and record their votes. Yet these were the descendants, only a few generations removed, of the men who fought under Washington for the right of self-expression and self-government. And notwithstanding this aggressive campaign a large percentage of people did not take the trouble to vote.

The same apathy is in evidence in Great Britain, although not to the same extent. Nevertheless it is sufficiently noticeable to lead Sir Sidney Low in an article in the *Weekly Dispatch* to say: "They will fight, and even die, to secure the vote. They obtain their votes and neglect to use them. Deny them the franchise, and they have an intolerable sense of injury and are ready to embark on revolution or rebellion in order to redress the wrong. Yet the privilege bestowed by so many years of effort is treated with strange indifference when the fight is over and forgotten."

With a general election pending in Canada it became necessary to compile new and up-to-date lists of qualified voters, but it was also necessary in all our large centres of population to plead with and exhort and continually urge men and women to take the trouble to register in order that they might vote, and party workers had in numerous cases to practically drag people to the registration booths. And it has been the experience in every election that thousands of people have to be gone after and conveyed to the polls to vote. In Australia a law was recently enacted making failure to vote an offence punishable by fine, and South Africa, the scene of a bloody war to obtain the right to vote, is now contemplating passing a similar law.

On September 11 next the people of Canada are called to the polls to choose their representatives in the House of Commons and to determine who shall constitute the Government of Canada and what policies shall prevail in the enactment of future legislation and administration. It is the duty of every qualified voter, man and woman, to vote. No other business, no matter how important, can equal this in importance. It is not only Canada's business that is at stake, but your own personal business—those things which can only be done for you in a collective way, but your own business nevertheless.

Do not imagine it is any sacrifice on your part to devote a few minutes, or even hours, in discharging the obligations of your Canadian citizenship on one particular day in order to determine the character of Canada's Parliament for the next five years. Rather you will be making sacrifice of your own best interests if you fail to discharge your duty and exercise the greatest privilege of your citizenship, the permanent loss of which you would regard as a great grievance and outrage.

National Air Lines

Vast Network of Airways Planned For United States

A vast network of national air lines, covering the country, north, east, south and west, is the realization in sight of the United States department of commerce, according to announcement by Secretary Herbert Hoover, after a conference with President Coolidge. Two main arteries of the proposed system of aerial highways, stretching from New York to the Pacific coast and into the southwest from Chicago to Dallas and Fort Worth, were approved at the talk at the summer White House.

Autos Kill Many Birds

Motors Cut Wide Swath and Make No Distinctions

Illinois' state entomologist estimates that 100,000 birds are struck and killed yearly in that state alone by automobiles on concrete roads. At the same time on the same highways official figures show that more than 11,000 chickens were slaughtered last year, 12,500 rabbits, 20,000 geese, 1,300 turkeys, 7,500 snakes, 2,000 cats, 2,750 cats and 650 polecats. The motor car's acyde of death cuts a wide swathe and makes no distinctions.

LIFE WAS A BURDEN

Restored to Health Through the Use of Dr. Williams' Pink Pills

"It is a pleasure," says Mrs. Rosa Bouter, of Victoria, B.C., "to tell you of the new health and strength I got through the use of Dr. Williams' Pink Pills. Before taking the pills life was a burden to me. I was so badly run down that I did not know what to do. My blood seemed to have turned to water, I was very pale, constantly tired and was losing flesh. It was a trial to attempt housework. Added to this I had a bad cough and my husband and friends thought I was going into consumption. The medical treatment I was taking did not appear to be doing me any good. I had about given up hope when a friend urged me to try Dr. Williams' Pink Pills. I got six boxes and found so much benefit that I got six more boxes. Before these were all taken I was thin and had turned pale to good health. I gained in weight, the cough left me, my appetite returned and I once more had a good color. Better still, I was able to do my housework without fatigue. Needless to say I always recommend Dr. Williams' Pink Pills to ailing friends, and I hope this will be the means of pointing the road to good health to some other sufferer."

Try Dr. Williams' Pink Pills for anaemia, rheumatism, neuritis, nervousness. "Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. If you will send us your name and address a little book, 'Building Up the Blood,' will be mailed you prepaid. This book contains many useful hints. You can get these pills through any medicine dealer or by mail at \$5.00 a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Relief from Asthma. Who can describe the complete relief from suffering which follows the use of J. D. Kellogg's Asthma Remedy? Who can express the feeling of joy that comes when its soft and gentle influence relieves the tightened, choking air tubes? It has made asthmatic affliction a thing of the past for thousands. It never fails. Good druggists everywhere have sold it for years.

Stop Dangerous Practice

President Coolidge Bans "Poisoning" of Industrial Alcohol in U. S.
President Coolidge let it be known through his official spokesman that he is opposed to the "poisoning" of industrial alcohol, and Assistant Secretary of the Treasury Winston has ordered the discontinuance of the use of poisonous formulae.

The president of the United States has received hundreds of protests against the practice on the ground that many deaths have resulted and that, with the widespread sale of alcohol by bootleggers and the large quantities of industrial alcohol which are diverted for beverage purposes, the poisoning of the product might conceivably affect a large section of the population.

Minard's Liniment for Cerna and Warts

WHEN USING
WILSON'S
FLY PADS
READ DIRECTIONS
CAREFULLY AND
FOLLOW THEM
EXACTLY

There is
only one
way to kill
all the Flies

This is it—Darken the room as much as possible, close the windows, raise one of the blinds where the sun shines in, about eight inches, place as many Wilson's Fly Pads as possible on plates (properly wetted with water but not flooded) on the window ledge where the light is strong, leave the room closed for two or three hours, then sweep up the flies and burn them. See illustration below.
Put the plates away out of the reach of children until re-quitted in another room.

Fly Pads

Minimum Wage Law

Higher Minimum Wages to be Paid to Women and girls in Saskatchewan

Higher minimum wages for women and girls employed in Saskatchewan shops and stores, laundries and factories and mail order houses are contained in new orders issued by the Saskatchewan Minimum Wage Board to come into force Sept. 21.

The minimum for female employees in shops and stores is raised from \$14 to \$15 a week. Learners are to receive \$10, \$12, and \$13.50 a week during the first, second and third periods of six months respectively. At present the rates are \$7.50, \$10 and \$12.

A feature of the new regulations is that they provide that seats must be supplied in the proportion of at least one to every four employees engaged in shops or stores.

The minimum in laundries and factories is raised from \$12 to \$14, while the rates for learners are unchanged. For all time worked beyond 36 hours both experienced and inexperienced workers must be paid not less than the minimum rate.

In shops and stores and laundries and factories and mail order houses no deduction for statutory holidays is allowed to be made from the minimum wage.

The minimum wages for female employees in mail order houses is also raised from \$12 to \$14, while the rates for learners are set at \$9 instead of \$8 for the first six months and \$11 instead of \$10 for the second six months.

The most obstinate corns fall to rest Holloway's Corn Remover. Try it.

Conductor Retires After Long Service

Conductor Thomas Silbard, of division 17, Belleville, Ont., has retired from the service of the Canadian National Railways, making his last run up his 67th birthday, after completing 44 years and four months of service. He entered the railway service as signalman in 1882 at a wage of \$1 per day. Since then at one time or another, he has had charge of every train running between Toronto and Montreal.

To Conquer the Air

Will Be Accomplished When Aircraft Designers Solve Problem of Hovering

Hovering is the greatest problem that faces the designers of aircraft. For lessons in this art the designer would do well to study the buzzard, which can remain stationary in the air without any visible movement of the wings for a considerable time. When a strong gust of wind comes the outward halves of the wings are bent right back almost at right angles to the body halves of the wings. In this way the buzzard, stationary facing a sea gale—a wind which blows most other birds backwards. It is seldom that the buzzard flaps its wings—and it never gives more than three successive flaps at a time while remaining stationary.

When man has learnt the secret of the flight of the buzzard he will have conquered the air.

Its Quality Sells It.—The fact that so many thousands of intelligent people continue to use Dr. Thomas' Electric Oil speaks volumes for its healing efficiency. Ever since it was first introduced it has grown steadily in public favor, owing entirely to its manifold usefulness in relieving and healing sicknesses. As a specific for cuts, burns, scalds, and various inflammatory pains its record is beyond reproach.

Pessimism

First Taxicab Driver—"I met my wife in a taxi cab, and over 'er with me car an' later married 'er."
Second Taxicab Driver—"If every body hadda do that they wouldn't be so much reckless drivin'."

Dairy Industry In Canada Is Forging Ahead, Particularly In The Western Provinces

Indications continue to be given of Canada's continued ascent to enhance in the dairy industry. British Columbia has just produced another world's champion cow after this honor has fallen in the past to many other Canadian provinces as well as on another occasion to the Pacific coast province. Canadian dairy stock has come to be in demand in many countries and recent purchases have been made by Russia, which business it is anticipated may reach important proportions. Production of dairy products continues to increase, particularly in the western provinces, which have so seasonally made a mark in this industry. The increasing volume of export trade is reflected in the expansion of storage facilities at Canadian ports.

Butter production in Canada during 1925, according to the final report of the federal department of agriculture, amounted to 180,665,782 pounds, as compared with 178,893,927 in the previous year. Ontario and Quebec rank and neck in production, the former provinces leading with an output of 60,081,141 pounds, closely followed by the latter with 59,942,382 pounds. Next in order come the three prairie provinces, Alberta leading with 19,500,000 pounds; Saskatchewan accounting for 15,946,233 pounds; and Manitoba's figure being 13,683,212 pounds. Nova Scotia's production was 4,504,156 pounds; that of British Columbia, 4,210,000 pounds; Prince Edward Island, 1,583,131 pounds; and New Brunswick, 1,222,927 pounds.

From all over the Dominion come reports of yet further augmented production this year, especially in the western provinces, where the remarkable progress achieved in the dairy industry in the post-war period is being continued without abatement. Saskatchewan, for instance, in the first five months of the present year produced 6,082,631 pounds of butter as against 5,891,581 pounds in the period in 1925, an increase of 30.6 per cent. Looking back to the years before the war, the advance of the Dominion in this connection has been quite outstanding. Canadian butter production in 1915 was only 83,991,463 pounds, that of a decade later showing an increment of 115 per cent.

One Farm That Pays

Operated Near Philadelphia by Innates of Boy's School

Nearly every farmer will tell you farming does not pay. But there is a farm close to Philadelphia which last year was credited with a profit of \$20,400.

That was done on 600 acres. What was the secret? It was operated by nearly 600 schoolboys who received no pay for their labor.

So it seems that the trouble with farming is high cost of labor, rather than high cost of things farmers must buy.

That farm which made a net profit of \$20,400 belongs to the Glen Mills school, and not everything which comes from those Delaware county fields was placed in the profit column; oh, dear, no.

Expenses fell just short of \$10,000, and that sum was subtracted from the \$40,400 which the farm produced in one year.

Pennsylvania could afford to run free express trains to carry all our state welfare workers out to Glen Mills to see how scanty, when applied to an unfortunate lad, will produce golden results—Philadelphia requires.

Rare Animal In Hudson Strait

The norwell or sea unicorn is a rare and valuable species of sea animal occasionally found in the northern waters of Hudson Bay and Strait, says the natural resources intelligence service of the department of the interior. It possesses a long ivory spiral horn extending forward from upper jaw, sometimes 8 feet long when mature and valued at about \$3 per pound.

By means of active radium injected into the body, the rate of blood flow in the human system has been measured accurately for the first time.

W. N. U. 1443

Many U. S. Farmers For Canadian West

Over Three Hundred Came Through Fargo, N. Dakota, In June

Immigration of actual farm settlers from United States to Canada continued actively, according to information given out at Ottawa. In the month of June the Canadian Government agent of Fargo, North Dakota, recorded the movement to Canada of 354 American settlers. These farmers, accompanied their wives and families, represent a population of 541, an increase of 49 per cent. over the same period a year ago. They brought with them cash and effects valued at \$1,387,750. The movement of cash and effects at the Fargo agency alone in the single month of July amounted to \$886,200. The Fargo agency is one of 18 maintained in the United States by the Canadian department of immigration and colonization.

Trans-Pacific Bees

Work in B.C. During Summer and in Australia During Winter

Bees have not yet given notice of striking for an eight-hour day but they may yet get together and protest against the double-season work started by an ingenious beekeeper in British Columbia. To make his bees gather two crops of honey per year instead of one, he has adopted the plan of keeping them in British Columbia during our summer months and then shipping them across the equator down to Australia when winter comes to the Northern Hemisphere. After the voyage across the Pacific the bees are supposed to emerge from their hives and start to work on their second summer of the year. How long the beekeeper intends to keep up this shuttle system has not been learned.—New York World.

Boosting Hog Production

Expect to Ship One Million Dollars Worth of Hogs From Prince Albert District

Hogs to the value of \$400,000 were shipped from the Prince Albert district in 1925. This sum was far in advance of that received the previous year and the increase was due to a considerable extent to the activities of the agricultural society boosting hog production. This year the hog raisers' slogan is one million dollars worth of hogs, and from present indications this mark is more than likely to be attained.

"Johnny, what do you mean by coming to school like that? Your hair is disgraceful."

"No comb, miss."

"Can't you use your father's comb?"

"No hair, miss!"

Teen-Age Boys For Canadian Farms

A party of 20 boys ages 15-17 years, left Southampton recently for Canada on board the Canadian Pacific liner Minnedosa. The boys who have each received free passage under the Empire Settlement Act are being sent out under the auspices of the Ontario Government and on arrival in Canada will proceed to the government farm, "Vimy Ridge," near Guelph, Ontario, from where they will be placed on selected farms and receive after care and supervision from the Ontario Government for a period of three years.

Crop Acreage In Manitoba

Aggregate Slightly Less Than Two Per Cent. Smaller Than 1925

The Manitoba department of agriculture states that final figures as to acreage sown this year in Manitoba to wheat, oats, barley, fall rye, spring rye and flax show the aggregate acreage is a little less than two per cent. smaller than it was in 1925, being very close to the same acreage as in 1924. In wheat the southern districts of Manitoba show a greater acreage this year than last, but there is a shrinkage in the northern parts. Oats show a slight decrease practically in all districts. Though barley has increased slightly in the central western part of Manitoba, it is down almost two per cent. in the whole province. There is quite a drop in rye, but an increase of about 40 per cent. in flax.

On the whole, the acreages of 1925 and 1926 are more nearly alike than the acreages of any two successive years for some time.

The figures were compiled from individual returns submitted by over 12,000 farmers, and the total number of farmers estimated as being in the province in 1926 is 51,100.

For statistical purposes the province is divided into fourteen crop districts.

Argentine Improves Quality Of Butter

Factories Equipped With Everything Necessary For Pasteurizing Cream

Since October, 1924, when the Argentine department of agriculture began its campaign for the improvement of Argentine butter, 35 of the 62 butter factories in that republic have been equipped with the necessary installations for the neutralization and pasteurization of all the cream they use in butter making. The resulting improvement in quality and uniformity has helped materially in marketing Argentine butter in the principal foreign market, England. The results of the campaign have been so satisfactory that it is now predicted that in another year every important butter manufacturer in Argentina will be treating all cream according to this system.

Egg Production Increases

Canadians Now Eating More Eggs Than In 1920

Egg production in Canada has increased to over one hundred million dozens, or seventy per cent., since 1920, according to a government report. This enormous volume of eggs has been consumed almost entirely in Canada as a result of the improved quality and increased consumption brought about by the application of the egg regulations.

In 1920, Canadians consumed only 16.3 dozen eggs per capita, while in 1925 the per capita consumption was 26.8 dozen.

Photographs are used in teaching English in the schools of the Philippines.

Possibilities Of Beet Culture And Beet Sugar Manufacture Throughout Western Canada

Gives Splendid Returns

Butter Pays Farmer Better Than Any Product He Markets

The butter industry returns the farmer more of the price paid for butter by consumers than any other product he markets, according to the national dairy council in the United States. During the last year the farmer has received from 73 to 80 cents out of every consumer's dollar, while he averaged only 45 cents from meat, potatoes and wheat, three other staples of life. In addition to this, he has been paid a daily cash return on his investment and labor, and his cows have supplied fertilizer necessary to maintain the productivity of his land.—Simcoe Reformer.

A Productive Hen

Nebraska Hen Produces 1,186 Eggs In Eight Laying Seasons

Producing 1,186 eggs has been the lifetime work of a White Leghorn hen, owned by the state agricultural college of Nebraska.

Just passing the thousand mark puts her in a class sought by many, but achieved by few hens, according to Prof. E. H. Muesel, who says there are records of only three or four hens in the world to reach that number. The hen is nine years old, has had eight laying seasons and still has a future of productivity, they profess.

Hutterite Colony

Operates Own Stores and Other Commercial Enterprises

So successful have the Hutterites been with their colony, some 40 miles east of Calgary, that they have paid more than \$150,000 cash for farm lands west of Beiseker, 45 miles north of Calgary, as a colony site. About 45 persons will comprise the colony which is self-contained, operating its own stores and other commercial enterprises. The members are allotted supplies and funds by the secretary-treasurer and work on a community co-operative basis.

An Excellent Showing

T.B. Test In New Saskatchewan Free Area Is Gratifying

Out of 3,590 head of cattle recently reported as tested for tuberculosis in the New Saskatchewan T. B. area, east of Last Mountain Lake, only 29 reactors have been discovered, or only one and a half per cent. This is an excellent showing in comparison with similar tests in T. B. free areas of Manitoba, Quebec and British Columbia, and is not far behind the phenomenal record set by Prince Edward Island.

Sugar manufactured in Western Canada, from beets grown in that territory, is now on the market, and the whole of the prairie provinces is elated over the successful launching of the first sugar factory at Raymond, Alberta. There is general enthusiasm over the prospect opening out of beet sugar production in Western Canada on a very substantial scale, for it is confidently felt that this is but the initial step in a great combined agricultural and industrial movement, the first of a chain of factories which will come to dot Southern Alberta from the main line of the Canadian Pacific Railway to the international boundary, and spread eastward into sections of the sister provinces of the prairie.

There is every reason for this optimistic attitude. The pioneer company which has been responsible for this first Alberta enterprise has declared its willingness and desire to expand through the erection of other factories in the Southern Alberta area, and all conditions are such as to induce them to carry out this programme of expansion. It is known that there are other companies anxious to establish sugar factories in other districts of the Canadian west, and circumstances and conditions are combining to bring them to the decision to take this step. That "well begun is half done" offers every indication of being extremely applicable to the production of sugar beets and beet sugar in Western Canada.

The preliminary work accomplished so successfully in Southern Alberta has given a tremendous impetus to attention to the possibilities of beet culture and beet sugar manufacture throughout Western Canada, and from developments which have been undertaken in other sections of the prairie, in a consideration of the expressed desire of other industrial organizations to locate in Canada, this new and valuable activity, bearing so many agricultural and industrial benefits in its wake, is due for wide expansion in the future.

Manitoba, through the experimental farms in the province, has long been experimenting with sugar beets, mainly with the object of testing the leading varieties for manufacturing purposes, with results that have been generally satisfactory and indicate that beets grown in different parts of the province could meet factory requirements. The first really serious investigation into the growing of beets in Manitoba was undertaken in 1924. The Manitoba Sugar Company, distributed, under the supervision of an experienced sugar beet man, seed to one hundred farms at forty points within a radius of seventy-five miles of Winnipeg. At the request of boards of trade in the west to Brandon, Portage la Prairie, Yorkton and Prince Albert. Another enterprise grew beets on 260 test plots throughout the eastern and southern portions of the province, chiefly in the Red River and Assiniboine valleys.

Despite early, wet weather, 80 per cent of the crop was satisfactory, and early analysis pointed to a sufficient sugar content and purity. Results on the whole were considered encouraging enough to justify arrangements for an increase in the acreage in 1926. The city of Brandon showed itself particularly interested and energetic. Samples of beets grown in the district were shipped for testing purposes to the Manitoba Agricultural College, which has installed a special equipment for the analysis of sugar beets, and to the American Beet Sugar Company, Grand Forks, N.D.

Was Rather Expensive

A little boy of six put his arm into a water hydrant in New York. It took the fire brigade half an hour to wreck the hydrant so that the little arm could be liberated. And it will cost several hundred dollars to replace the shattered hydrant.

Waggish Diner (with menu)—Chicken croquettes, eh? I say, waiter, what part of the chicken is the croquette?

Waiter.—The part that's left over from the day before, sir.

Being sorry for others is sometimes a mild form of boasting.

WORLD HAPPENINGS
BRIEFLY TOLD

A hundred million dollar farm credit to afford relief to farmers soon will be under consideration by President Coolidge and several New York bankers.

Rev. Brother Theodore de BUI, O.M.I., well known as a designer of Catholic churches and missions, is dead in his 52nd year. He had designed edifices in all parts of the Dominion.

Development of two processes for the distillation of coal at low temperatures, which, it is predicted will solve England's coal mining labor surplus, has been announced by the International Combustion Engineering Corporation.

J. Antonia Beaudry, 49, well-known Montreal business man and publisher of Le Prix Courant, a Montreal weekly review, was found shot to death in his office. It was at first thought that he had died a natural death, but an examination at the morgue led to the discovery of a bullet in his back.

The total world wheat crop apparently will be slightly above that of last year, according to estimates received by the department of agriculture at Washington. Demand, however, may be stronger because of low stocks of old wheat, reduced supplies of rye and potatoes and short wheat crops in the Orient.

Printed Frocks the Vogue For All Occasions

Fashion—more practical than we give her credit for—has given her smart endorsement to the frock of printed material. For luncheon and afternoon wear, the model pictured here is smart, and not too dressy, and may be fashioned of crepe de chine, rayon or cotton voile. The frock is straight in line except for the flared sections set in at the sides, which are very full at the lower edge, and a scarf collar tying on the left shoulder. Long, loose sleeves are set into the armholes. No. 1307 is in sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 38 bust requires 2 1/2 yards 35-inch figured material; the collar 1/2 yard contrasting cut crosswise. Price 20 cents. Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make with out difficulty an attractive dress. Price of the book 10 cents the copy.

Canadian Development
(By C. W. Peterson)

It would be well for Canada to take stock of herself, her resources and her institutions and commence to formulate national aims in keeping with her peculiar conditions and limitations. Have we, for instance, any rational ideas in respect to our population requirements? Should we aim at the status of Russia with 15 per cent. urban and 85 per cent. rural population, or should we strive to reach the standard of the United States with 67 per cent. urban and 33 per cent. rural population? At what point lies the normal equilibrium for Canada? Obviously, such questions as these must be answered approximately before we can attempt to construct intelligent, rational development policies. Some years ago an "Economic Commission" was created by our Federal Government to give us the answer. It never made a report and died on the job. Thinking persons can, however, all agree on one point, namely, that our present agricultural population is ridiculously out of proportion to the vast area of our agricultural lands, east as well as west, fairly fit for settlement. There can be no manner of doubt that this condition must be remedied as promptly as humanly possible. It constitutes, in fact, our great, national tragedy. As was suggested at the last Dominion Board of Trade conference, "Canada's best brains should be commended for public service and focused on correcting this lopsided, uneconomic state of affairs, because we can have no lasting prosperity until increased agricultural production overtakes our present greatly over-extended industrial, governmental and transportation plants.

There is, however, a deplorable absence of intelligent opinion in Canada on the vital question of colonization. Important occupational groups are at present even in violent hostility to public expenditure in this direction, their judgment being founded largely on superficial premises. The press of Canada has a patriotic task to perform in bringing the actual facts before their readers and creating a vigorous and militant public opinion on this issue. Because governments in democratic countries move only in obedience to the will of the people. The initiative, therefore, must come from the great body of Canadian citizens rather than from their government.

Prince May Open Building

New Canadian Hostel in Paris is Almost Completed

A visit of the Prince of Wales to Paris is now under consideration. It is understood he promised two years ago that, if possible, he would open the hostel which is now almost completed for the accommodation of Canadian students in the Cite Universitaire in Paris. This has been designed to accommodate 50 Canadian students at a cost of approximately 2,600,000 francs, given for the purpose by Senator Joseph M. Wilson, of Montreal. Hostels planned for French students, both men and women, and obviously inspired by Oxford colleges, were opened last autumn. The Cite Universitaire, when completed, will be one of the most interesting groups of academic buildings in Europe. The buildings are here erected on the spot where the old fortifications of the city of Paris stood. Out of the 22,000 students now at the university, 3,300 come from other countries.

Modern Advertising

Is Much Less Expensive Than Old Methods of Selling

The old indictment that advertising adds to the cost of goods has been quashed by experience. Advertising is a machine to aid in distribution. The public never questions the cost of a machine in a manufacturer's plant which adds to volume production. If the public didn't pay for the new machine it would pay for the most costly hand labor. No more is the machine of modern advertising wisely employed, a subject of query and speculation as to cost. It takes the place of older, more expensive methods of selling and distribution.—World's Work.

Luck may come and luck may go, but real merit hangs on forever.

GOLF CHAMPION

NED McKENNA, golf pro. at Minaki Inn, the Canadian National Railways summer hotel at Minaki, Ont., who captured the open and professional golf championship of western Canada during the recent tournament held in Winnipeg.

Notable Revival in Trade

Business Activity in Canada is Maintained at a High Level

Stimulated by the profitable marketing of the excellent crops of 1925 and by the prosperous conditions in the United States during recent months, business activity in Canada was maintained at a high level during the first half of 1926. Construction was especially active from April to June, the contracts awarded in May reaching a record for all time. Revenue car loadings were also greater in the second quarter, when allowance is made for seasonal variation. The primary iron and steel industry operated at a comparatively high level of activity with orders from the railways and construction industry. Industrial employment showed significant improvement during the first half of the year, attaining on June 1 and July 1 a higher level than on the corresponding dates of any year since 1920.

Following the pronounced expansion recorded at the beginning of June there was a further important increase in employment on July 1, when the payrolls of 5,595 operating firms aggregated \$56,718, persons, or 20,693 more than in the preceding month. These additions to staff exceed those reported on the corresponding date of any previous year and the index of employment, at 103.7, now stands higher than in any other month since 1920. With the exception of logging, in which there was a seasonal decline, all groups of industries reported improvement, that in construction being the most extensive.

Stop the Cough.—Coughing is caused by irritation in the respiratory passages and is the effort to dislodge obstructions that come from inflammation of the mucous membrane. Treatment with Dr. Thomas' Electric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be satisfied.

Huge Production For Population

The density of population in the prairie provinces is only 2.5 persons per square mile, yet these provinces in 1925, produced 388,433,000 bushels of wheat, 322,354,000 bushels of oats, 94,141,000 bushels of barley and 11,545,000 bushels of rye, besides other crops. In comparison, the United Kingdom has 329 persons per square mile.

OUR CROSSWORD PUZZLE

- Horizontal
- 1—Wind indicator.
 - 4—Applaud.
 - 8—Aid.
 - 11—Capable* of being obtained.
 - 14—Part of "to be."
 - 16—Curtain.
 - 17—Light blow.
 - 18—Either.
 - 19—Irruption household god.
 - 21—Hose supporter.
 - 24—Metallic substance.
 - 25—And not.
 - 27—Former kingdom of Spain.
 - 28—Vulgar fellow.
 - 29—Formed like a cube.
 - 31—Member of parliament (abbr.).
 - 32—Silk fabric.
 - 34—Like.
 - 35—Organism living off another.
 - 38—Constitute (abbr.).
 - 39—1,100.
 - 40—Flows forth.
 - 41—College degree.
 - 42—Prostrate.
- Vertical
- 44—501.
 - 45—Poles of a derrick.
 - 47—Corners.
 - 48—Cut down.

- 62—Musical note.
- 63—N or p t h latitude.
- 64—You.

SUNDAY SCHOOL LESSON

AUGUST 29

THE TEN COMMANDMENTS:
DUTIES TO MAN

Golden Text: Thou shalt love thy neighbor as thyself. Leviticus 19:18.
Lesson: Exodus 20:1-21.
Devotional Reading: Proverbs 2:1-7.

Explanations and Comments

The Law of Filial Piety, verse 12.—Thou shalt honor—love and respect—thy father and thy mother. This is the first commandment with promise, Eph. 6:2, "that thy days may be long in the land which Jehovah thy God giveth thee." The promise coupled with this command, in common with almost all the promises made to the ancient people of God, applies rather to the nation than to the individual. The people among whom the sacredness of the family ideal is maintained, whose children render obedience to their parents during the time of immaturity, and always honor them, will be the nation of strength, retaining its hold upon its own possessions, and abiding."

"The parent who does not secure the allegiance and obedience of the child is as really violating the fifth commandment as the child who dishonors and disobeys him" (Wm. M. Taylor).

Miller's Worm Powders were devised to promptly relieve children who suffer from the ravages of worms. It is a simple preparation to destroy stomachic and intestinal worms without shock or injury to the most sensitive system. They act thoroughly and painlessly, and though in some cases they may cause vomiting, that is an indication of their powerful action and not of any nauseating property.

Empire First Campaign

Should Be Taken Advantage Of By Canadian Shippers

Canadian shippers to Great Britain should take advantage of the Empire First Campaign being conducted by the British Government to have Canadian consumers choose empire goods in preference to foreign products, and should mark all their goods with a label bearing the legend "Empire Goods—Canadian," according to J. Forsyth Smith, fruit specialist of the Canadian trade commissioner's service, Liverpool, Eng., and fruit representative for the Imperial economic committee.

Time is a sort of perpetual motion arrangement for making yesterday of tomorrow.

Answer to Last Week's Puzzle

New French War Device

British Air Officials Interested in Pilotless Air Ram

A pilotless, radio-controlled air ram is said to be the latest deadly weapon which France is preparing to use against her enemies in the future. This steel-nosed aeroplane is said to have been demonstrated successfully at Quereville, near Cherbourg, and to have given promise that it might in time of war, dash straight at a formation of enemy aircraft wrecking havoc on their planes. British air service officials are intensely interested in the reports of the new death dealing device, for they realize that if it is perfected it will play havoc with close formation flying, the backbone of the British air tactics. The new manless plane is said to be no made that it can be directed either by radio from the ground or from the cockpit of an accompanying plane. Observers claim that they have seen the pilotless "ram" loop the loops and go through nearly all the stunts of which a piloted ship is capable.

Predicts Early Fall

Early arrival of cool fall weather is predicted by Prof. Gayle B. Pickett, ornithologist at Northwestern University, from the congregating of purple martins near the campus. Shortly, he said, the birds will start on their southward flight and autumn will come with their leaving.

Requires Some Work

It takes 150,000 bees a full working day to gather and prepare a pound of honey which retails for a few cents. Canadian honey is now sold in regulated grades, and it is finding ready sale in Europe and elsewhere, where the excellent flavor and grading is being recognized.

FORM A BRITISH PEACE LEAGUE TO END ALL STRIKES

London.—A new organization called the Industrial Peace League of the British Empire has been founded. It is announced, to bring about industrial good fellowship, between employers and workmen in Great Britain and eventually to establish a five-year truce between capital and labor.

In this way the promoters of the new organization hope to eliminate both strikes and lockouts.

The leading spirit on the Labor side is J. Havelock Wilson, veteran president of the National Seamen's Union. Sir Frederick Lewis, banker and shipowner, is mentioned for the chairmanship, and Frank Hodges, former secretary of the British Miners' Federation, for the post of secretary. Among the objects of the new organization are loyalty to Great Britain, the sanctity of contracts, the right to work and the stamping out of the doctrine of class war. It is considered unfortunate for the prospects of the new society that both Wilson and Hodges are now discredited among the rank and file of British trade unionists, since both are regarded as standing too much to the right.

France To Retrench

Will Cut Down Wheat Importsations By 28,000,000 Bushels

Paris.—Cutting down wheat importation to the extent of 28,000,000 bushels this ensuing year is one of the first economies the government announced as part of the nation's retrenchment programme. Dr. Andre Queuille, minister of agriculture, told the cabinet that by increasing the percentage of whole wheat in flour, the country could dispense with 5,000,000 bushels this coming year. A further saving of 23,000,000 bushels could be effected by the obligatory use of ten per cent. of other cereals in bread making.

This is the first of a series of measures intended to reduce the French outlay for living to be placed before the cabinet. Other similar economies will be considered along this line.

Sowing More Winter Wheat

U. S. Farmers Plan Larger Acreage For This Fall

Washington, D.C.—Farmers are intending to sow this fall an acreage of winter wheat 14.4 per cent. greater than sown last fall, which would mean a total acreage of 54,064,000 acres or about four per cent. more than shown by intentions a year ago, the department of agriculture announced.

If average annual abandonment should occur this winter, it would leave from the intended sowings about 39,274,000 acres for harvest next summer, an increase of 7 per cent.

Anti-Foreign Outbreaks

Paris.—Anti-foreign demonstrations in Paris, hitherto aimed to a great extent against American and British visitors, were recently directed against Poles and Czechoslovaks. Crockery and glassware were broken when an angry French crowd attacked tourists from Poland and Czechoslovakia in a restaurant. No Americans or Britishers were involved.

May Remove Boots

Austin, Texas.—If men passengers on Texas railroads wish to ride in their stockinged feet, they may do so without interference from the Texas railroad commission. The commission declined to act on a petition signed by a woman demanding a rule that men be prohibited from removing their shoes, boots or sandals in railroad passenger coaches.

Fire Fighters Found

Vernon, B.C.—Reports from Trinity Valley say that three fire fighters, lost for two days in the woods in that district, reached the ranch of Walter Remberg, where they were given food and shelter and later taken to Lumby.

Dirigible Norge Reaches Seattle

Seattle, Wash.—Stowed in a hold of the freighter, Tanana, among 50,000 cases of canned salmon, the dismantled dirigible, Norge, arrived here from Teller, Alaska, enroute to Rome.

W. N. U. 1643

Plan Department Store Chain

Company to Operate String of Stores From Coast to Coast

Toronto.—Twenty-two department stores of Canada with appraised assets of about \$10,000,000 are included in a new company, Canadian Department Stores, Limited, which is being formed by the Municipal Bankers' Corporation of Toronto, according to The Toronto Telegram.

"Ultimate intention is to expand and enlarge the chain until it reaches from coast to coast in Canada. Sir William Hoarst is president of the banking company, and Sir John Willison is vice-president." The Telegram states. "This merger of interests is being effected in such a manner that there will not be any immediate issue of securities of any kind to the public of this country. Average number of years in business of shops taken over is 44 years. Two important businesses, one in Montreal and one in Hamilton, will be included in the list, but their names are not yet mentioned."

Big Game Hunters Dine

Duke of York Among Number Who Met in London

London.—Thirty of the world's most famous big game hunters, with the Duke of York and the Earl of Lonsdale among their number, dined together in London recently.

It was one of the rare gatherings of the Shikhar Club, an exclusive private club formed some years ago by Lord Lonsdale. Membership of the club is confined to redoubtable Shikharis—men who have sought after big game beyond the edge of civilization. "The King, who has shot more than a score of tigers, is the honorary president of the club."

Cowboys Are Injured

Accidents Occur to Mar Stampede Held at Ottawa

Ottawa.—Three western cowboys were injured at the stampede being staged here in connection with the capital's centenary celebration.

Ray Miller, of Cheadle, Alta., sustained a smash-up when thrown by a broncho; Basil Allard, Hardisty, Alta., suffered concussion of the brain in a similar manner; and Don Holt, Miles City, Mont., was gored by a wild steer in the bull-dogging contest. All three were reported as progressing favorably toward recovery.

Fire In Swedish Mine

Several of Largest Buildings Destroyed at Kiruna

Stockholm.—The world's most northerly mining center, Kiruna, located far above the Arctic circle in Swedish Lapland, has been swept by fire. Several of the community's largest buildings were destroyed, one fireman killed, and \$250,000 damage done.

The destruction was increased by the explosion of a depot of dynamite, near the blasting of Kiruna's vaara, the mountain nearby, which consists of iron ore.

Studies 3000-Family Scheme

The Earl of Clarendon, under-secretary of state for the dominions in Great Britain, with the Countess of Clarendon and their three children are touring Canada at the present time. His lordship is investigating the conditions under which the 3,000 family immigration scheme from Great

SAYS U. S. IS LEADING WORLD INTO A NEW ERA

Ronoke Island, N.C.—Belief that the United States is leading the world into a new era and better way of life that ultimately will bring "a great spiritual rebirth" and thereby universal peace—for which all men in all countries are truly longing today—was expressed by Sir Esme Howard, British ambassador to the United States. "He was the speaker at the anniversary of the birthday of Virginia Dare, first white child born in the American colony."

"The new message that I think America of today is giving the world is that the lives of men are more than mere goods and that peace and contentment are more than mere wealth. America's great contribution to the world progress is its human policy in industry, and you have learned the gospel of high wages, as has been called, and you have applied it and showed the world that it works," Sir Esme said. The material development of this country was set aside by Sir Esme as "a secondary matter."

Passenger Plane Wrecked

Flight From Paris to London Ends in Disaster

London.—Encountering a heavy fog along the English coast, a big French passenger plane, on a flight from Paris to London, met disaster near Folkestone.

Two of the passengers were killed, one of them reported to have been Robert Blaney, Boston, Mass.; the other thought to be an Italian.

The Victoria Hospital at Folkestone, to which nine injured, six of them United States citizens, were transferred, reported that all of the 19 in all there were 13 passengers on injured were in a critical condition. The plane. None of them escaped injury.

The primary cause of the disaster is presumed to have been engine trouble, for, upon seeking lower levels in the fog to find her bearings, the big machine, swerved suddenly and dropped swiftly. It struck the top of a barn.

Conditions Quiet In Russia

Polish Minister to Moscow Says Country Is Orderly

Warsaw.—Complete order reigns in Soviet Russia, according to Mr. Kent-czynski, Polish minister to Moscow, who has arrived in Warsaw on leave of absence from his post. The minister says that stories about conditions in Russia printed in the European press frequently are far removed from the truth. As to reported conflicts among the Communists, he remarked that the dissensions among the communists are no graver than divergencies that exist elsewhere in cabinets or government parties.

Competitors Of League

Pacts Among European Countries Are Second Line of Defence

Williamstown, Mass.—Regional agreements being made between nations in Europe representing a continuation of the balance of power policy is tending to undermine the foundation of the League of Nations, J. Peleny said, counsel of the Royal Hungarian legation, told the Institute of Politics.

He represented these agreements as competitors or "side shows" of the League of Nations. Referring to the agreement known as the "Little Entente" between Czechoslovakia, Jugoslavia and Rumania against Hungary, M. Peleny said the latter country found it difficult to understand why the first three countries, whose forces were individually superior to Hungary's, should form in alliance manifestly in opposition to Hungary.

Recent rapprochments among the central European countries indicate that the new alignments are not necessarily along belligerent lines, he said, but their establishment as a "second line of defence in case the league goes smash" hardly indicates a bona-fide trust in the efficacy of the league.

Delay in the Mails

Letter Takes 35 Years to Travel 200 Miles

Toronto.—Thirty-five years ago a friend of Mrs. J. T. Marshall, wife of the pastor of a local Baptist Church, wrote to her from Glen Rae, Lambton County, Ontario. The letter has just arrived here, having taken 35 years to travel less than 200 miles. Evidently it had rested in the dead letter office for the greater part of that time. Stamped on the front of the envelope was the date "October 22, '91," and on the back "Toronto, Ont., Oct. 27, '91." Mrs. Marshall was attending the Toronto normal school at that time.

Lady Strathcona Dead

Was Daughter of Former High Commissioner For Canada

London.—Lady Strathcona and Mount Royal, daughter of the late Lord Strathcona, a former high commissioner for Canada, is dead in her 73rd year.

Lady Strathcona was Mrs. Margaret C. Howard, receiving her title on the death of her father in London, in 1914. Her father, Sir Donald Alexander Smith, later raised to the barony, played a prominent part in Canada, for many years, during the last century, becoming a member of parliament in the Canadian House of Commons and later being appointed high commissioner in Britain for the Dominion.

Jap Prince Climbs Wetterhorn Geneva.—Prince Clitichibu, second son of the emperor of Japan, has successfully climbed the Wetterhorn, which is more than 12,000 feet in altitude. Several European Alpinists have been killed in the Alps recently.

TO ARRANGE FOR BIG WHEAT POOL MEETING SOON

Winnipeg.—Representatives of the principal wheat growers' organizations of the United States and the Canadian wheat pools met in Winnipeg as a provisional committee to arrange for the World Wheat Pool conference to be held here some time next winter. Matters relating to data to be submitted to the delegates, proposed methods of organization and other preliminary business was under consideration. It was pointed out that H. W. Wood, president of the Alberta Wheat Pool, was now in Australia, and that W. J. Jackman, director of the Saskatchewan pool, was proceeding to Buenos Aires, to arrange the wheat producers of these countries to the importance and value of the pools to the farmers.

The activities of the Canadian wheat pool were detailed and spokesmen predicted that the pools would handle about 80 per cent. of the prairie wheat crop this season.

Says Flag Dispute Has Been Exaggerated

Matter Will Blow Over Asserts South African Trade Commissioner

Winnipeg—"I personally have no fear of violent repercussions as a result of the flag controversy. It will all blow over in time," declared E. H. Louw, trade commissioner in Canada and the United States for the government of the Union of South Africa, interviewed here.

Mr. Louw pointed out that Sir William Campbell, president of the South African section of the British Empire Service League, and Captain Jordan, president of the Cape Town section of the league, had openly, in the press, supported the government in its flag policy.

"This controversy," he said, "has been greatly exaggerated."

To Foster Balkan Peace

Pact Between Greece and Rumania Now in Prospect

Athens, Greece.—A friendship pact between Greece and Rumania, similar to the one just signed between Greece and Jugoslavia, is now in prospect for the furtherance of peace in the Balkans, it has been authoritatively stated.

It is expected another agreement between Greece and Turkey, settling important political and economic matters, will be signed soon.

The government has stated that military provisions may later be added to the Greco-Slav friendship treaty which has still to be ratified by the respective parliaments of the two countries.

Col. By Monument

Ottawa.—The corner stone for the monument to the memory of Col. By, founder of Bytown, which later became Ottawa, was unveiled here in the noon gun sounded from Parliament Hill. The monument will be just south of Connaught place, the central plaza of the city by the side of the Rideau canal, the construction of which he directed a century ago.

Saizis Ex-Greek Premier

Athens, Greece.—Papanastasiou, former premier and leader of the Democratic party, has been arrested. He was arrested in connection with a political plot early in the present year and was banished, but several months later President Pangalos ordered his liberation.

Will Ban Liquor Ads

New York.—All foreign magazines containing liquor advertising will be barred from the United States if a tentative ruling by Edward F. Bremer, acting solicitor of the customs house here, is sustained.

C.N.R. Gross Earnings

Montreal.—The gross earnings of the C.N.R. for week ended Aug. 14, 1926, were \$4,921,089, as compared with \$4,700,000 for the same week of 1925, an increase of \$220,950, or five per cent.

Trail Riders Finish Romantic Journey

1. Trail Riders filing down to the Fairmont
Valley. 2. "Trail Riders" with the party.

A cavalcade of 250 horsemen, the
Trail Riders of the Canadian
Rockies, whose long rides and ex-
ploits over the twisted trails of "The
Top of the World" have become
classic, returned recently to Lake
Louise from their annual ride, thus
adding another romantic page to the
history of this organization in the
West.

Their return was strangely silent
and different in fact than one might
expect, without thinking, expect. No undue
ceremonies or song terminated the
mountain journey of these men and
women from all parts of America and
Europe, for being true nature lovers
they had, in their communion with
the silence of the mountains found
the solace therein. The spirit of their
order, was, they knew, "a reverence
for the majesty and beauty of nature."
Their homage had been paid and
their journey ended. They would
revel in the memory of it silently, for
they had learned, as someone has
put it, that "great joy lies great
griefs are silent."

But the spirits of the Riders on
the trail at all times ran high. While
camped on the fat heights of Pt.
Margit Pass a rodeo was held with
no end of local western color.
Harry Knight, Canadian bucking
horse champion, Guy Wendick of
Calgary Stampede fame, Bill Bugby,
Chief Buffalo Child Long Lance, and
many other well known figures in the
west accompanied the Trail Riders
in this rodeo was carried on at an

altitude of 8,000 feet and brought
about an important discovery
amongst the scientists of the party.
It was found that a horse that leaped
four feet into the air at the Calgary
Stampede was only capable of a two-
foot leap at this high altitude. Guy
Wendick was in charge of this novel
stampede above the clouds.

The great Pow-Wow which took
place in the Fairmont Valley on
August 14th, combined the Riders of
two parties which had set out from
Banff and Lake Louise with plans
to meet at this point. The two
parties met on the second day near
Baker Lake. A picturesque scene
they made with their bright scarves
fluttering as the long line of horses
cantered down the trails. Perhaps
the most picturesque of all the group
of riders and cowboy hats, all expert
riders and splendidly mounted. Each
was eager to earn the gold button of

the Trail Riders given to those who
have ridden 500 miles in the saddle.
Artists, writers, scientists, explorers
and others of international reputation
made up the parties. In the ranks of
these loyal devotees of the trail were
men with such distinguished titles
as Duke de Leuchtenberg, Count of
Rouhamo, and the Marquis d'Al-
bair. Other prominent members who
recently completed the ride at Lake
Louise were, Morley Roberts, John
Murray Gibson, Lawrence J. Burpee
and Madge MacBeth all well known
writers, and Carl Runquist, Leonard
Richmond, R.E.A., A. C. Leighton
and other prominent artists.

The directors have decided that
next year's ride should be a six day
one through the Asiniboine country
covering over 100 miles. On the third
day this party will be joined by a
three-day contingent through Red
Earth Creek and Mt. Ball.

Here and There

Following a recent tour of western
Canada, W. L. Smith, former
editor of the "Farmer's Sun", writes
that he will be surprised if the
aggregate wheat crop of the Prairie
Provinces falls below 400,000,000
bushels. "It will not be surprising
if the 500,000,000 mark is nearly
reached," states Mr. Smith.

Eleven hundred farms will be
needed next year to accommodate
the British settlers who will be
brought to western Canada, ac-
cording to Major E. J. Ashton,
commissioner of the Soldiers' Set-
tlers Board. So far this year 1,430
families were placed on farms in
the prairie provinces by this or-
ganization.

Hogs to the value of \$400,000 were
shipped from the Prince Albert dis-
trict in 1928. This sum was far in
advance of that received the pre-
vious year and the increase was due
to a considerable extent to the ac-
tivities of the agricultural society boost-
ing hog production. This year the
hog raisers' slogan is one million
dollars worth of hogs, and from
present indications this mark is more
than likely to be attained.

Arrangements for the export of
large quantities of British Columbia
seed potatoes to California are be-
ing made by a potato grower of that
state. The British Columbia pota-
toes are desired in California for
seed purposes because they intro-
duce new strength into the south-
ern strain. Experiments were
made with Canadian grown seed
last year in California and growers
were well satisfied with the results.

A flock of 48 sheep, comprising
35 ewes and 11 rams, has been pur-
chased by an official of the Domini-
on Government under instruction
from the Soviet Government for dis-
patch to Vladivostok, as soon as
arrangements can be made for their
shipment. Last year quite a num-
ber of prize-winning cattle were
shipped from British Columbia to
Russia and this new order indicates
that previous shipments have been
satisfactory.

Many valuable shipments of furs
from the great trapping areas of the
Hudson Bay Company are ar-
riving through the Dominion Ex-
press at Montreal. These unim-
porting bales, piled high on the
trucks often represent a total value
of \$200,000. After being collected at
the various Hudson Bay posts along
Hudson Bay and James Bay the
furs are brought down by canoe
in summer and dog team in winter
to the northern terminus of the
T. and O. Railway.

Remarkable expansion of passen-
ger traffic into and out of Mont-
real has been reported during July
and August by the passenger de-
partment of the Canadian Pacific
Railway. The "Red Wing" and the
"Alouette" on the Boston run and
the "Rideau" and "York" to To-
ronto, four new trains de-
parted on these routes early in the
year have been running with cap-
acity loads. Eastward to Quebec
there is heavy traffic for the An-
cient Capital, while trains running
north into the Laurentians, it is
stated, have never been so filled as
in the case this summer.

A muscalunge, 85 pounds in
weight, with a length of 59 inches
and a girth of 21 inches, was taken
from the French River near the
French River Bungalow Camp re-
cently, according to information re-
ceived by the tourist department of
the Canadian Pacific Railway. This
fine fish was taken by E. A.
Farrish of New York with a 90-
lb. silk test line and using Club
Minnow bait. To date this is the
largest fish caught this year to be
entered in the annual French River
Bungalow Camp Trophy competi-
tion.

CHAPTER XII.—(Continued)

Still, fight with herself as much as she might, nothing seemed to matter so much as John. She had intended to spend the rest of the night packing her new things and her old, for she had no idea of sleep. There'd be lots of time for sleep when she was thoroughly convinced she wasn't asleep and dreaming anyway. She had wanted just to pack and talk to George through the night and shape vague things that she planned to do for her into a definite program. This last idea George dismissed with a practical, "Wait until you know where you're at. I'll take my fun reporting about you and old Good Morning. I always did want to land that bird. Now that you're gone, maybe I'll get a chance." Joanna agreed that this wouldn't be a bad idea, and George concluded: "Then when I've got him watch me double cross him! That is, maybe I will and maybe I won't. Who knows? He's not such a bad bird at all."

Joanna was not in the mood to discuss Mr. Good Morning or even Kenilworth, who had ordered her to call him "Ruddy"; further ado, or Yvonne, whose career from Cairo to London and America was as well known to George as to any other reader of the Sunday press, or Brian do's insistent and sinister probing of her. Instead, she cross examined George patiently about John.

With little success. George was detached, her roving eyes engaging her attention with ever new splendours creeping out in the sheets or the trim or the drape of one of the new things hanging about the room. "He said he wanted to see you and square the deal, and that he'd hunt you up tomorrow," was all that George would vouchsafe.

With the morning Joanna, decided. She sent to John a brief little note that cost her an hour. She wanted him—as always and as usual. Everything was all right. They wouldn't talk about that night when he accused her. But he must come to her—at Yvonne's! This dispatched to John's workroom in the office of the firm where he was working up to his career, she went to the bank.

The unformed dreamer remembered her. In his manner there was none of the subterfuge with which he would have met any other of the bank's customers, even the most important, at the announcement that it was the Chairman of the Board himself.

DRAGGING-DOWN PAINS RELIEVED

Woman Suffered Nearly a Year.
Lydia E. Pinkham's Vegetable Compound Brought Her Health

Moore Jaw, Sask.—"I am going to try to tell you what Lydia E. Pinkham's Vegetable Compound has done for me. I suffered nearly a year dragging-down pains and inflammation, also pains in my right side over my hip and down my whole leg. I took my leg. I had it nearly a year when I went to a doctor and he said I would have to have an operation. But my mother said to take Lydia E. Pinkham's Vegetable Compound as it saved her life years before. I took two bottles and I found I was better, so I kept on taking it and also used Lydia E. Pinkham's Sensitive Wash. I have had two more children since then and am perfectly well. I used to have to lie down two or three times a day, and now I do all my housework without trouble. I always keep the Vegetable Compound in the house as I find a dose now and then helps me. I am willing for you to use this letter any way you like and I will answer letters. If I can help any other woman I'd be only too glad to try."—Mrs. Emma Houghton, 712 Athabasca W., Moore Jaw, Saskatchewan.

Lydia E. Pinkham's Vegetable Compound is a dependable medicine for all women.

For sale by druggists everywhere. C

self, whom the caller wished to see. He led Joanna directly through the marbled corridors, past the rattling shutters in vice-presidents, cashier and other important functionaries, from whom the girl caught glances of interest. It seemed as if the entire institution was alert to her. Eggleston rose to receive her. Again she saw a great gentleness beneath the grave, austere exterior of this man whose harshness was a tradition that even she knew. In his presence she trembled at her own audacity in coming to speak to him of her little matters.

"But you may always come to me at any time," the banker assured her patiently.

"I have made up my mind what to do," she told him when she had sought some other opening and failed to find it. "It isn't very much, just that I have found a great friend who will show me how—I mean who will help me."

"But I wanted to tell you how happy it made me!" Joanna exclaimed. The sudden change in him distressed her. He had gone far away from her, and she had always sensed him as very close, very close to her in some unfathomable way. "I would not take the money—none of it if it should continue the thing I want John to think of me!"

She was gazing at him too earnestly not to see. His hardness vanished from his face and his eyes as gently as the passing of a shadow. His fingers reached out for the jade paper weight and toyed with it, as she had observed him do during her first visit to him. When he spoke again it was as if she were not there, as if he spoke to a memory. "Yes, there are times when money doesn't count. So long as youth knows this everything's all right."

Joanna nodded to him quietly, silently. At that moment she understood that something had gone from one to the other of them. But she couldn't for the life of her explain what. As a moment she was telling him about John—of their school days and of their coming together again in the city when she was on her own, and he, with neither fortune nor chance to build for his career; of her hope in him and of their plans, that had all gone awry.

"But have they?" Eggleston interrupted. "Doesn't he figure some way in your prospects?" Joanna consented. "Yes," she admitted. "But I don't know how yet. I don't think I'd make him happy just yet. There's a lot for him to learn, as there is for me." Then she added brightly, "But I'll figure it all out some way. And now may I have some more of my money? I'm going to begin to spend, you know."

(To be continued)

The forked tongue of a serpent is merely its organ of taste.

Just a little fun, as you call it. But you can buy a lot of pleasure with the money you have. Won't it fall on you after a while?"

"Perhaps. I don't know. I'm a little bit afraid I don't know much of anything, you see. So I want to learn. It's a lot of responsibility somebody has put onto my shoulders, isn't it?"

For a time he didn't answer. When he did he asked her abruptly, "When is your candidate going to be?"

"I don't suppose you know her. Miss Cousin, Yvonne Cousin. She's very famous, you know, and has heaps of money of her own. Men are always in love with her. She's thrilling!"

Again he was silent, and then Joanna thought there was something cold in his voice. "Yes, I know her. I fancy almost every one does. Let's see—is she divorced now or married?"

"Divorced. But that doesn't make any difference, does it?"

"Not the slightest." He spoke

briefly. She was sure now that he had gone cold. She decided not to dwell after all upon her plans. She spoke of John, and Miss Graydon, was deeply concerned by your report of the young man's misunderstanding. He gave me to believe also that you were disturbed by that circumstance. As your banker I took it upon myself to protect your interests—even if those interests were at the moment a mere young man. If I offended I am sorry. You are a valuable patron of the bank. I would not offend you."

"But I wanted to tell you how happy it made me!" Joanna exclaimed. The sudden change in him distressed her. He had gone far away from her, and she had always sensed him as very close, very close to her in some unfathomable way. "I would not take the money—none of it if it should continue the thing I want John to think of me!"

The Firemen's Coffee Stall

Van Accompanies London Force To All Large Fires

In London, England, the equipment of the firemen is usually followed to a fire by a green motor van. This is the London firemen's coffee stall. It attends all fires that are likely to prove "long jobs," and does invaluable work in supplying snack meals to the men, who would otherwise be forced to spend hours without food or drink. The van holds three twenty-gallon urns, two filled with boiling water and one containing cocoa. A large cupboard on one side of the van contains numerous tins of biscuits and large mugs. The other side is on a hinge and can be supported to make a shelter for the men when they refresh themselves at the improvised counter. The cook rides inside the van and is assisted by the driver in dispensing the food. The van, which started as a horse-drawn vehicle, will shortly celebrate its twenty-fifth birthday.

Mentally Deficient in China

1,341,000 Lunatics and No Government Hospitals For Their Care

There are 1,341,000 lunatics in China, according to a compilation just made based on replies to questionnaires sent to 260 physicians. There are no government hospitals for their care, and only private or mission institutions.

"The mentally deficient in China receive no money and are sure to starve for the death penalty for the commonest offence, stealing. In one part of China the mentally sick are taken into the country and chained beneath a heavy stone, placed on the chest. If this fails to restore sanity the victim is allowed to die of starvation."

Stomach Cramps Yield to "Nerviline"

When doubled up at midnight with cramps you don't feel like experimenting; what you want is something to remove the cramp. Nothing acts so effectively as Nerviline. Take twenty drops in a little sweetened water, or suck it as with the cramp is gone. Nerviline is about five times as strong as most medicines, and because so strong, only a small dose is required to give instant effect. For stomach, gas, fermentation, cramps, etc., Nerviline should be handy in every home. For sure protection, get "Nerviline" today. 35c at dealers.

Growth of Automobile Industry

May Be Some Time Yet Before Saturation Point is Reached

Professor C. E. Griffin, of the Business Administration School, of the University of Michigan, estimates that 27,000,000 automobiles will be in use in the United States by 1930. He is a recognized authority on the automobile industry.

"Although any ventured estimate cannot be absolutely accurate," Professor Griffin said, "it is certainly possible to say that should this be the saturation point the automobile industry would not stop. The present output of 4,000,000 cars each year would be necessary at this point merely to supply worn-out cars."

All mothers can put away anxiety regarding their suffering children when they have Mother's Grain Worm Exterminator to give relief. Its effects are sure and lasting.

Little Helps For This Week

O Thou that hearest prayer, unto Thee shall all flesh come.—Ps. lxxv. 2. If there be better, and the dream of it. The longing for it, shows that there must be. It is not in ourselves; it is the God. Beyond, whom our souls seek; the search of prayer.

More life we ask of Him who is the life.

The reason why we pray is this, we must.

—Lucy Larcom.

Prayer is the measure of love.—Saint Augustine.

Prayer, administering the perpetual lesson of humility, of love, of love, makes us feel our connection with Heaven through every touch of our necessities; it binds us to Providence by a chain of daily homage; it impresses the heart of all with a perpetual remembrance of the God of all.—George Croly.

Scheme is Successful

English Families Making Good Under Overseas Settlement Plan

"The great majority of English families settled on Canadian farms under the overseas settlement scheme are making good." This was the statement of the Earl of Charendon, parliamentary secretary of the overseas settlement committee who was in Vancouver in the course of a tour of Canada during which he is endeavoring to visit as many of the English settlers as possible.

SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of little ones as is the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand, the baby may be beyond all human help before the mother realizes the cause. Summer is the season when diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any of these troubles may prove deadly if not promptly treated. During the summer the mother's best friend is Baby's Own Tablets. They regulate the bowels, awaken the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at a price a box from The Dr. Williams Medicine Co., Brockville, Ont.

He knew—"Who's the most important man in the village?"

The Native—"Now look here, stranger, you'd better ask that there question of somebody else in these parts—I never was much of a feller (or talker) about myself."

Stony Plain and District.

Mr E Golz is in Calgary this week, attending a convention.

Mr K Andrew Ulmer is confined to his home at present, having received an injury to his back last week.

Mr Joe Miller made a motor trip on Monday to Wainwright, to inspect the oil fields.

Miss Leah Mahalik, Ledue, who had been visiting for a week in Stony with Miss Lily Comisarow, has returned to her home.

Mr and Mrs S A Liebert and daughter, from Delphi, Indiana, were visitors this week with Mr and Mrs Geo Liebert. The party is on their way to California.

On Sunday afternoon next there will be a confirmation service at Immanuel Lutheran Church, Rosenthal; Rev G Poetzsch pastor.

Good-sized crowds were in attendance at the Hon. Chas. Stewart's meeting at Warden School last night. The meetings for the balance of the week are : To-night, Golden Spike; Friday night, Winterburn Hall; Saturday night, Stony Plain. Mr Stewart will speak at all these meetings, as he is spending this week in this district, renewing old friendships. The dates of Mr Stewart's other meetings are printed in another column.

On Sunday last the dedication took place at Mewassin of the edifice for the Reformed Church. Services were held in the afternoon and evening, by the pastor, Rev G H Reppert, assisted by Rev J Hoffmann of Beaver Hills, and Rev Paul Sommerlatte (of Edmonton) (Supt. of Home Missions). Large congregations were present at both services.

School Teachers' Directory.

Troumsh—Miss Mabel Carr White Whale—Mr Ledé

Warden—Mr Thos Dick Weidenheimer—Miss A Simpson.

Portview—Miss A McKinlay Temploman—Miss K Powell

Dehister—Glen Carmichael Tig 3 last schools are in Telford-

ville district, across the river

Spruce Grove News

On Sunday morning next a confirmation service will be held at St. Matthew Lutheran Church, Spruce Grove. Rev G Poetzsch, the pastor, will conduct the service.

Mrs G R Dickie and her daughter Dolores are spending one week at the Jasper Highway Amusement Hall. Dolores is trying to pass away the time playing her violin, which she handles very nicely.

Mr Wuerz now has his new well down 30 feet and is assured a plentiful supply of water. Mr Cargill, the boiler inspector, u.k'd his boiler, on his inspection trip here last week.

Mr Dave Bell made a motor trip to the City on Sunday.

Rev J J O'Halloran left on Tuesday for his new pastorate at Castor, much to the regret of his parishioners. The work at St Joseph's Church is being taken up by Rev Father Keenan, recently ordained, a graduate of the college in Edmonton. He takes charge of the service on Sunday next.

Mr Dickie has a staff of carpenters at work completing the roof on the Jasper Highway Amusement Hall, and has a dance billed for Tuesday next Aug 31, with Martin's Orchestra supplying the music

The threshing season opened here Monday last, when Dan Brox had his field of barley tended to by Phil & Jac Fuhr's well-known outfit.

Work on the new elevator is now progressing at a rapid rate, under Supt. Emery of the Construction Co.

Schwindt's Hall was crowded Tuesday night on the occasion of the campaign meeting in the interests of the Hon. Charles Stewart. Mr D Brox was the chairman. Addresses were given by Dr Outway, Mr Bryant and the candidate. Mr Stewart dealt with the constitutional question, Customs probe, the alleged Session movement and other matters of interest at the present time, and gave numerous reasons why the Liberal party should be returned on Sept. 14.

The first thing which strikes the eye as you enter Mr McKeen's Meat Emporium this week is the beautiful assortment of veal cutlets on the Marble Slab, these being the specialty this week; along with the T-bone and Porterhouse steaks, and choice pork chops to be found in this first-class butcher shop.

1926 AUTOMOBILE

ROAD MAP HERE.

All Main, Secondary and Intermediate Trails Plainly Shown

The 1926 edition of the Automobile Road Map of Alberta, described by James W Davidson, president of the Alberta Good Roads Ass'n, as the most authentic and accurate yet made, is just off the press. It is published by the Western Canada Road Route Service Ltd, of Calgary.

A copy of map has been received by the Stony Plain Sun and a perusal of it shows the great care and infinite work that was necessary in its preparation.

It is announced that the map will be on sale in most of the stationery stores and garages in Alberta or may be secured direct from the publishers.
